

LMS Administrator Quick Start Guide OLP Integration with D2L-BrightSpace

QUICK START GUIDE

National Geographic's Online Practice LMS Integration is designed to help you seamlessly integrate our digital resources within your institution's D2L-BrightSpace Learning Management System. This is a simple process that you should be able to complete using the steps outlined in this document. This Quick Start guide provides basic steps for setting up your LMS environment.

CREATE A NEW COURSE TEMPLATE

- 1. Go to the Course Management section of D2L and select *Create a new course template and a new course offering that has never been offered before*
- Use a name that will make it easy to identify. We suggest NGL, the book and level. Ex: NGL World Link Level 1
- 3. We recommend you create a course template for each NGL product you have adopted
- 4. Once you have created the course you will need to configure an LTI tool with the parameters sent to you in our configuration document.
